

AMENDMENTS

Amendments to Specification

At page 1, line 1 replace the paragraph that reads:

This application claims the priority of U.S. Provisional Application Serial No. 60/428,386, filed November 22, 2002.

with the following new paragraph:

This application is a continuation application of and claims the priority of U.S. Non-Provisional Patent Application Serial No. 10/719,796 filed November 21, 2003, which is incorporated herein by reference. This application likewise claims the priority of U.S. Provisional Application Serial No. 60/428,386, filed November 22, 2002.

Listing of Claims

This Listing of Claims will replace all prior versions, and listings, of claims in the application:

1. – 20. (canceled)

21. (new) An aircraft flight data recorder adapted to be carried aboard an aircraft, the aircraft flight data recorder being adapted to receive from a plurality of sensors located on the aircraft a plurality of digital data signals, at least one of the sensors including a camera adapted to output at least one digital image data signal including respective image data, the image data including at least one of still frame image data and motion video data, the at least one digital image data signal being compressed at the camera by at least one compressor located at the camera, the at least one compressed digital image data signal being encoded in IP format by at least one IP encoder located at the camera, the at least one compressed digital image data signal in IP format being transmitted to the aircraft flight data recorder, the aircraft flight data recorder comprising:

a nonvolatile memory array; and

an interface, the interface being adapted to receive the plurality of digital data signals, the interface being adapted to convert into IP format any digital data signal not received by the interface in IP format, a set of digital data in IP format corresponding
